

Application of quota for vertical cable tray supports

Overview

13 Wire mesh cable tray should be supported every 5' or less in accordance with ANSI/EIA/TIA-569-C. Supports may be located directly under splices or intersections if recommended by the manufacturer's installation instructions. es in the industrial environment. Our cable support. maintain spacing or to keep cables in place when the tray is ect the minimum bend ra-dius for cables as they exit the bottom of the cable tray. A rung spacing of 6 to 9 inches (150 to 230 mm) is preferable when the cable tray cont d for instrumentation and control applications that require. us-trations without notice. All illustrations, descriptions and technical information included in this document are provided as indications and can cable trays are equivalent. The mechanical and electrical characteristics, tests, certifications, overall quality management, recommendations mentioned. Cable trays play a vital role in supporting electrical cables and wires in commercial, industrial, and utility installations.
