

Armenian power distribution box configuration

Overview

Armenia operates one Soviet-designed VVER-440 nuclear unit at Metsamor, which supplies over 40% of the country's energy needs. The EU and Turkey have expressed concern about the continuing operation of the plant. Overview The electricity sector of Armenia includes several companies engaged in electricity generation and distribution. Generation is carried out by multiple companies both state-owned and private. In 2020 less than a quarter of. According to in 2015 electricity generation in Armenia increased since 2009 to nearly 8000 GWh, but still remains below 1990 levels. Also, in 2015 Armenia consumed more than twice as much na. Nuclear power provides 38% of the electricity in Armenia through one operating nuclear reactor, Unit 2 of, which is a reactor with extra seismic reinforcement. It was created in 1.
