

Australian AI Server 200G

Overview

Servers Australia offers high-performance GPU server hosting in Australian data centres, powered by NVIDIA L4, A16, L40, L40S, H100 and H200 GPUs. Ideal for AI development, LLMs, scientific computing and advanced digital workloads, with full customisation and. Boost AI, generative AI, and compute-intensive workloads with servers that offer a variety of powerful GPU accelerators. FS offers a complete portfolio of AI networking switches designed to meet the needs of next-generation AI training and inference environments, providing flexibility across 200G, 400G, and 800G architectures. Modern AI and machine learning workloads are redefining the limits of network. The CX-N series is particularly noteworthy, featuring a vast array of ports including 800G, 400G, 200G, and 100G, with capacities ranging from 2T to an astounding 51. Their latest 800G AI switch is a game-changer, boasting ultra-large capacity with 64 x 800G Ethernet ports with a total. The Australia AI Server Market is expanding rapidly as enterprises and research institutions deploy AI-optimized infrastructure to handle growing workloads. AI servers in Australia are specifically designed with high-performance GPUs, TPUs, and specialized processors to accelerate deep learning. Accelerate and scale AI solutions efficiently while managing and protecting all your data from pocket to cloud. Why Choose Lenovo Hybrid AI solutions?

Everything you need to drive real AI transformation. The H100 NVL is a behemoth, designed for the most demanding AI workloads, offering unparalleled performance and memory capacity.
