

# Australian Smart Micro-Module Manufacturing Plant

## Overview

Kanowna Solar PL is building a 9MW plant 60 miles west of Moree in New South Wales. It will deploy 27,500 Sepahim MX Modules from China's Jiangsu Seraphim Solar System Co. This marks the largest single commitment under the federal. Chinese manufacturer Sunman is to build a 500 MW per annum solar module production facility in the New South Wales Hunter Valley after securing funding support from both the state and federal governments. Dr Zhengrong Shi, the solar PV pioneer once dubbed the "sun king" and who became the solar industry's first billionaire through his company Suntech, has unveiled plans to build a big manufacturing centre in Australia to make his Sunman flexible solar panels. Dr Shi first unveiled the Sunman. The Australian Renewable Energy Agency (ARENA) has announced up to A\$151m (\$98. The funding is part of the government's A\$1bn Solar Sunshot programme, which was. The New Standard for Modular Housing Solutions starts with ModnPods. We are leaders in manufacturing architecturally designed housing solutions with people and the planet in mind. We are committed to lead with clarity, innovate in.
