

Base station fiber optic hybrid cable

Overview

A robust and compact hybrid fibre cable for interconnecting power and optical links between main and remote units for outdoor and indoor radio base stations. CommScope bundles hybrid cabling to your custom specifications, using our high-performance fiber-optic, unshielded twisted pair and coaxial cables. Higher Bandwidth required in the Digital Ceiling Next generation Wireless Access Points (WAP) and Distributed Antenna Systems (DAS) for 5G and beyond. Proterial Cable America's cell tower cables are built for long-term durability and consistent signal transmission in harsh, demanding environments. Designed to support wireless networks at scale, these solutions deliver the performance trusted by vendors who support top wireless carriers like. Single-mode or multimode fibers are housed in loose tubes that are made of high modulus plastic and filled with tube filling compound, In the center of cable is a metallic strength member, The tubes and copper wires are stranded around the central strength member to form a cable core.
