

Bfoc and st interface

Overview

The ST connector (developed by AT&T), also called BFOC 2.5 the Bayonet Fiber Optic Connector 2.5 mm, has a simple design targeting Datacom network applications. An optical fiber connector enables quicker connection and disconnection than splicing. ST Connectors, also known as "Straight Tip" or BFOC (Bayonet Fiber Optic Connector), were developed by AT&T in the mid-1980s as a cost-effective and space saving alternative to the larger Biconic Connector. With a bayonet-style coupling, the ST Connector offers a quick half-turn lock, making it. SCALANCE XC206-2 manageable Layer 2 IE switch; IEC 62443-4-2 certified; 6x 100 Mbit/s RJ45 ports; 2x 100 Mbit/s ST/BFOC ports; 1x console port; diagnostics LED; redundant power supply; temperature range -40 °C to +70 °C; assembly: DIN rail/S7 mounting rail/wall redundancy functions; office features. Photographs and graphics are not to scale and do not represent detailed images of the respective products. LC connectors dominate high-density panels and modern transceivers (SFP/SFP+, QSFP), while SC remains common in enterprise and FTTH; ST.
