

Cable tray centerline positioning tool

Overview

In the Electrical workspace, click Manage tab Preferences panel Cable Tray . Enter 0 for Offset A and for Offset B. under Justification, select Left or Right for Horizontal, and/or. A plane laser is a great tool to use if you're a cable technician or electrician. There are several great products to choose from. The M12™ Green 360° 3 Plane Laser can speed up the way you. By default, the cable tray that you draw is center-aligned horizontally and vertically. You can change the alignment and also specify an offset distance. Changing alignments is useful if you want to. The Cabling tab of Plant Modeller contains tools for routing cable ways and cables. Cable ways can be open or closed cable trays, channels, or cable ladders. Bad alignment between two components, where the leave direction and arrive direction of adjacent elements do not match, (this can be due to the current design tolerance. Cable laying in commercial and industrial facilities, refineries, sewer system or tunnels often places high demands on workers and equipment. For this kind of cable laying technique, KATIMEX® offers a robust and effective solution to guide cables through cable ducts from different manufacturers.
