

Cable tray start point

Overview

On the Cabling tab, in the Cable Tray group, click Route (Alt+T). Specify the settings for the new cable. Cable tray lines are continuous, consisting of interconnected straight cable tray pieces and components such as reducers and curves, or miter joints instead of curves. Cable tray parts do not fully or partly overlap each other. All illustrations, descriptions and technical information included in this document are provided as indications and can cable trays are equivalent. The mechanical and electrical characteristics, tests, certifications, overall quality management, recommendations mentioned. Is your cable tray system optimized for safety, dependability, space and cost savings?

Cable tray (or cable ladder) systems are a popular alternative to electrical conduit systems, as they have an outstanding record for dependable service, design flexibility and cost savings in commercial and. maintain spacing or to keep cables in place when the tray is ect the minimum bend ra-dius for cables as they exit the bottom of the cable tray. A rung spacing of 6 to 9 inches (150 to 230 mm) is preferable when the cable tray cont d for instrumentation and control applications that require. Hubbell's NEXTFRAME® Ladder Tray is the effective and widely used cable runway that supports and delivers bundles of cable between cabinets, racks, and closets, along walls, and suspended from ceilings. The Ladder Tray features light, rugged, tubular steel construction. summarises the database hierarchy which AVEVA E3D™ uses to store cable tray design data.
