

# Cameroon Low-Power Optical Module 100G

## Overview

The QDCO1 operates at 28Gbaud and supports 100Gb/s tunable WDM transmission in the compact and popular QSFP28 pluggable form-factor, with low power consumption of <6Watts and support for 100GE and OTN clients. Our pluggable coherent optical modules support a variety of data rates, including 100Gb/s and 400Gb/s to enable application optimization based on capacity, distance and port type. In this. QSFP28 is the main form factor for 100G optical modules. This article reviews QSFP28 module types and key WDM technologies like CWDM and DWDM. The high bandwidth QSFP28 module supports 2 km and 10 km links over single-mode fiber via LC connector in. A 100G optical module is a high-speed communication device designed for data centers and telecommunication networks, capable of supporting transmission rates of 100 Gbps.
