

Can a router be bridged through a whole-house fiber optic cable

Overview

Q: Can I plug a fiber optic cable directly into a router?

A: Only if your router has an SFP port designed for fiber. Q: Do I need a special router for fiber optic internet?

A: While not all routers support fiber, many modern models. To connect your fiber optic cable to a router, ensure you have the following: Fiber optic modem (ONT): Most fiber connections require an Optical Network Terminal (ONT), provided by your ISP. A fiber media converter, also known as a fiber to Ethernet converter, allows you to convert typical copper Ethernet cable (e., Cat 6a) to fiber and back again. The. Bridge mode is a special router mode that disables the router functionality so you can use your ISP's combination router-modem unit solely as a modem paired with your own router. Wireless bridging involves connecting two routers wirelessly, creating a wireless link between them.
