

# Cloud Interconnect Data Center Analysis Report

## Overview

The emergence of the global COVID-19 pandemic has affected the market. Construction of data centers was grounded to a halt in some locations, but this was not the case everywhere. The construction projects in parts of Europe were. The emergence of the global COVID-19 pandemic has affected the market. Construction of data centers was grounded to a halt in some locations, but this was not the case everywhere. The construction projects in parts of Europe were halted completely for the sake of worker safety. Further, pre-construction activities like permitting had been temporary. “Market for carrier-neutral providers/internet content providers expected to grow at a considerable CAGR during the forecast period”The DCI market for carrier-neutral providers/internet content providers is expected to witness significant growth rate during the forecast period. The carrier-neutral//internet content providers operate most of the data centers and host thousands of servers. These data centers require terabits of optical transport capacity over metro, regional, and long-haul distances, which can be achieved by linking and transporting traffic between data centers using DCI. This requirement is expected to lead. “Market for optical DCI product type seg. Major vendors in the market include 1. Ciena Corporation (US), 2. Nokia Corporation (Finland), 3. Huawei Technologies (China), 4. Juniper Networks, Inc. (US), 5. Infinera Corporation (US), 6. ADVA Optical Networking SE (Germany), 7. Cisco Systems (US), 8. Extreme Networks, Inc. (US), 9. Fujitsu Ltd (Japan), 10. Colt Technology Services Group Limited. Driver: Rising migration to cloud-based solutionsWith the onset of web-based applications, the app architecture was so effortless that multiple apps could be easily hosted on a shared server. This took place without any significant compromises on performance. However, with the increase in the number of users and the complexity of apps, shared hosting became...
