

Communication towers require building permits

Overview

Getting permission to position a telecommunications mast on a property was, until fairly recently, straightforward. Planning permission was rarely required as masts and other apparatus fell within what was called “permitted development”. In December 2017 a new Code became. Building regulation for England covering requirements for infrastructure for electronic communications networks in buildings. This approved document takes effect on 26 December 2022 for use in England. Building or operating a communications tower means navigating a layered set of rules that span federal agencies, local zoning boards, and private lease. Tower owners must comply with a multi-layered regulatory, engineering, and safety framework that governs tower siting, where a cell tower can be built, how it must be designed, and how it operates throughout its lifecycle. The Electronic. This Order may be cited as the Town and Country Planning (General Permitted Development) (England) (Amendment) (No. development ancillary to radio equipment housing.
