

Complete Fiber Optic Communication Experimental System

Overview

With complete configurations and international standard parameters, it supports 6 core experiments, ideal for education, scientific research and technical training, helping users master key fiber optic technologies. This is an online, interactive lab that contains instructions, multimedia, and assessments where students can learn at their own pace. Agrawal, delivers brand-new updates and developments in the. Availability of plastic optical fiber (POF) The plastic optical fiber used in some of these experiments is available for science distributors. It is a 1000micron (1mm) POF available from several suppliers. The kit addresses the growing demand for education in fiber optics by providing a hands-on approach to understanding the. This manual contains ten laboratory experiments to be performed by students taking the optical fiber communication course (EE 420).
