

Copper plates for distribution boxes

Overview

The copper coil strip or sheet for distribution boxes is used to install the copper between the box and the wall. It consists of a single layer of copper with thick threads running through it, which is then covered in plastic covers to protect against damage. Compare over 30 copper, brass, and bronze alloys to find the right material for you—all with material certificates for traceability. Better wear resistance than copper and brass—all with material certificates for traceability Cut into custom shapes to align, space, and level components on dies. GRL's special-shaped hard copper bar products have insulation layers that can be made of casing, impregnated PVC, and sprayed epoxy resin, and can also be customized according to customer requirements. All sizes listed are in inches, unless otherwise noted. Copper plate is available in alloys: C10100, C10200, C11000, C17510, C18000, C18200. Offering excellent electrical and thermal conductivity, our range of copper plate products are available to our customers on an ex-stock basis. With one of the largest stock ranges in Europe, we provide our customers with a variety of copper plate options in grades and incremental sizes to suit.
