

Denmark Multi-Parallel Optical Module

Overview

IPtronics was a fabless semiconductor company headquartered in Copenhagen, Denmark. Its products include integrated circuits for parallel optical interconnect applications intended for the computer, storage and communication industries. IPtronics' design center is certified by STMicroelectronics, which is also their semiconductor foundry partner. In June 2013, IPtronics was acquired by Mellanox. Founded (September 2003) Headquarters Products Low-Power Single- & Multi-Channel Broadband Transimpedance Amplifiers (TIA) and VCSEL Drivers for Optical Data Communication Applications Parent History IPtronics was founded in 2003 and built up by former directors, managers and engineers from Giga A/S, which was acquired by Mellanox in 2000 for US\$1.25 billion. On June 4, 2013, it was announced. This technology enables parallel optical interconnect systems that computer manufacturers have begun to adopt in order to overcome the physical constraints from using copper-based connections over high speed interf.
