

Desktop Cabling System for Computer Room

Overview

The vertebrae-like flexible design ensures that the cables are safe during the operation. It works like a charm. At the same time, this modern device also adds a futuristic appeal to your desk. It comes assembled, and you will have to adjust the height as per your desk. After that, it's ready use as has been reported by several users. The slits also ensure that the heat is easily dissipated. This metal cord organizer is suitable for tiled, wooden, and glass tables. The company ships mounting accessories like adhesive pads and screws for proper installation. Interestingly, you can also paste two J-channel raceways one after the other, if you have a long desk. After that, you can drop the needed cables on the raceway to solve (some of) your cable woes. Do note to tie a few cables with zip ties to ensure a clean installation. It's worth noting that the Chouky cable management boxes have different dimensions, and you can use them as per the situation at hand. One of the boxes measures approximately 12.6 inches in length, while the other one measures 16 inches. As such, these can easily hold medium-sized power strips. After everything is in place, put them on the table's. Once assembled, you will need to route the charging cables to attain a clean look. Interestingly, this headphone stand is popular on Amazon and has received its share of love. At the time of writing, it had over 25,000 user ratings, with people appreciating its value-for-money proposition and easy-to-use design.
