

Distribution box installation distance requirements

Overview

The distance between the distribution box and the switch box should not exceed 30 meters, and the horizontal distance between the switch box and the fixed electrical equipment it controls should not exceed 3 meters. Check for proper IP/NEMA ratings and material quality. Ensure safe placement: install in dry, accessible areas with good ventilation and at appropriate height (typically ~1. The bottom surface. The installation requirements and specifications of Distribution box involve many aspects, including site selection, fixing method, wiring specifications and safety protection. Besides, it should be easy to find and convenient to access by electricians and maintenance personnel. Sufficient pre-installation preparation is the basis for the safe and smooth installation of the distribution box, mainly including the following aspects: Conduct a detailed survey of the installation site to determine the installation location of the cable distribution box.
