

Dutch Solution Linear Drive Pluggable Optical 400G

Overview

The 400G-FR4-LPO specification by the LPO (Linear Pluggable Optics) MSA defines a four-wavelength 100 Gb/s/lane, 53.125 GBd, PAM4 optical interface using standard single-mode fiber with reach up to at least 500 m, and host-module electrical interfaces for hosts with DSP based. AI-Specific Networking: a dedicated Back-End network for AI workloads to isolate them from other data center traffic and ensure low-latency communication. High-Speed Interconnects: Backend network requires high speed 100G/200G or 800G optics to connect servers and network switches. These high. Qualified for use across Juniper's 400GbE-capable ACX, MX, PTX, and QFX product families, Juniper offers a broad portfolio of 400G coherent and direct-detect optical transceivers to address the growing demand for bandwidth in metro, edge, core, and data center networks. It uses a linear drive strategy to replace DSPs with a Transimpedance Amplifier (TIA) and Driver Chip (DRIVER) with excellent linearity and EQ capabilities. These high-performance parts have been leveraged in leading module and system.
