

Ecuadorian Active Optical Cable 800G

Overview

The 800G OSFP Active Optical Cable is designed for 800 Gigabit Ethernet links over OM4 multimode fiber. This cable is compliant with IEEE 802.0, SFF-8679, and CMIS Rev 4. Transmission is based on VCSEL 850nm with electrical driver, while Receiver side is. The 800G Active Optical Cable (AOC) series redefines data-center interconnect performance by combining the simplicity of a pluggable copper cable with the reach and signal integrity of embedded optics. Engineered in the compact QSFP112 form factor, each AOC delivers an aggregate 800 Gb/s bandwidth. bps PAM-4 channels. The signal integrity severely stressed under high-speed data transmission is enhanced via advanced highest flexibility. The built-in digital diagnostics monitoring (DDM) allows access to real-time operating parameters. Integrated retimers enhance signal quality, minimizing data loss and crosstalk, making it ideal for.
