

Electrical Distribution Box Electronics

Overview

A Distribution Box, commonly known as a DB Box, serves as the central point for safely distributing electrical power from a main supply to multiple downstream circuits. It houses protective devices such as circuit breakers or fuses, ensuring both equipment protection and user safety. These Distribution Boxes enable decentralized installation of the electronics close to the load. SMART DISTRIBUTION BOXES FOR FLEXIBLE BUILDINGS. It has been designed to simplify the preparation of quotations and to define the configuration of metal cabinets and combination units. Used to house electrical or electronic switchgear, control gear and equipment. Unique, innovative, versatile enclosure made of ABS or polycarbonate UL 94 V0 • Patented, innovative, hinged quick-release catch technology without screws: open with a screwdriver, close by hand • More than 25 sizes and 150 standard. Fuses: Act as fail-safes, melting under excessive current to prevent damage.
