

Enabling SNMP on Huawei 2124 Fiber Optic Switch

Overview

Log in to the NMS, set the SNMP version to SNMPv3, set the user name, and set the security level. Based on the configured security level, set the authentication mode, authentication password, encryption mode, and encryption password. The Simple Network Management Protocol (SNMP) is a standard network management protocol widely used on TCP/IP networks. SNMP offers simplicity and power. This guide shows how to configure a Huawei device (e. However it is advisable to configure additional features - like an ACL. ☐☐ Welcome to our Huawei Networking Tutorial Series! ☐☐ In this tutorial, you will learn step by step how to configure Simple Network Management Protocol (SNMP) on a Huawei switch. How SNMP works?

Figure 11-64 Configuring SNMPv3 to implement communication between the NMS and switch Before configuring SNMP, complete the following tasks: Ensure that a reachable route exists between the switch and NMS.
