

# Energy-saving new type of trough-type tray cable tray

## Overview

The open-hole reinforced cable tray is a new type of energy-saving high-corrosion-resistant light steel tray cable tray, which reduces the material thickness, improves the bearing capacity, reduces the deflection value, and greatly saves the engineering cost. Each type is not “better” or “worse” in isolation—it is optimized for a specific set of conditions. Ladder Type Cable Tray The ladder type cable tray consists of two side rails connected by rungs, allowing excellent airflow around cables. Applications: Power plants and substations, Heavy. certification requirements and applications. Whether specifying a major new project, refurbishing existing facilities or doing the engineering, procurement and construction (EPC) for your end user, with T&B Cabletray, ABB offers reliable solutions du g conforming to ASTM A123 & ISO 1461 : m. Cable tray (or cable ladder) systems are a popular alternative to electrical conduit systems, as they have an outstanding record for dependable service, design flexibility and cost savings in commercial and industrial applications. Instead, they are formed into a three-dimensional, uneven structure through stamping.
