

Excess cables in construction site distribution boxes

Overview

You must use heavy-duty cables with UL listings for temporary sites. Integrating GFCI breakers into all distribution points is another must if you want. This guidance is aimed at those responsible for planning and subsequent management, and those who control the installation and use of electrical systems and equipment on construction sites. Order this product from HSE Books It explains what to do to reduce the risk of accidents involving. Learn what OSHA requires for temporary wiring on construction sites, from grounding and GFCI protection to overhead clearances and employer liability. Temporary wiring on construction sites must comply with the electrical safety standards in 29 CFR 1926, Subpart K. Braided screened cable may be used but the more usual types will.
