

Fiber Optic Switch IP Change

Overview

You can configure the device with a static IP address, or you can use a Dynamic Host Configuration Protocol (DHCP) server to set the IP address of the switch. The device supports both IPv4 and IPv6 addresses.

CONFIGURING THE SWITCH IN DESIGO CC/CERBERUS DMS.

0 Delivery of solutions fulfilling the Customers' multitude of Each physical chassis has one common IP address that is shared by all of the logical switches in the chassis. In. Fiber media converters allow you to connect two different types of network infrastructure: fiber-optic and copper (Ethernet). These devices are essential when you need to bridge fiber optic cables with Ethernet cables, especially in long-distance or high-speed network setups. This chapter includes the following sections:

- Information About Fibre Channel Interfaces, page 1-1
- Configuring Fibre Channel Interfaces, page 1-8
- Configuring Global Attributes for.
