

Fiber optic adapter communication equipment

Overview

A fiber optic adapter, also known as a fiber coupler, is a passive device used to connect and align two optical fiber connectors. It enables optical signals to pass from one fiber to another with minimal loss, ensuring stable and reliable communication., (two fiber connectors) such that light can reliably pass from one to the other with minimal insertion loss and maximum return loss. As a leading supplier of advanced fiber optic components, Molex has an extensive product offering that includes a full range of optical solutions from connectors, adapters and cables to backplanes and high-density interconnects. Molex's experience and resources provide customers a wide range of. That is why we manufacture high quality connectors and adapters with industry-leading materials which meet exacting standards.
