

Fiber optic cable indicator is lit

Overview

Fibre optic link is not Live, or there's an issue between your property and the BT exchange. Allow up to 5 minutes for the ONT to. As you can see there are 4 lights at the top of the OpenReach Full Fibre modem – Power, LOS (Loss of Service or Loss of Signal), PON (Passive Optical Network) and LAN (Local Area Network – but you know this one, right?

). Ensure your Fiber Jack is connected to the network and the LED lights are connected and working properly before moving. This white box connects to a fibre-optic cable that runs directly to your property and gives you access to our fibre broadband and voice services. The ONT has several lights on the front. No Light: The ONT is not receiving. The Optical Network Terminal (ONT) is a crucial device in modern telecommunications, serving as the interface between your home network and the fiber-optic internet connection provided by your Internet Service Provider (ISP).
