

Fiberglass cable tray I-beam type

Overview

The I-Beam cable tray design is another side rail style offered besides C-Channel side rail styles for customers that prefer this style. One advantage of I-Beam ladder cable trays is that hold down clips and expansion guides can be located on the inside or outside of the I-Beam cable tray. Eaton's B-Line series Marine Rung allows stainless steel banding of cables for coast guard requirements. It. Fiberglass - Technical Data Structural Characteristics of Cable Tray and Supports When viewed in its installed condition, any cable tray system performs functionally as a beam under a uniformly distributed load. There are four basic beam configurations typically found in a cable tray installation. In addition, its design does not contribute to potential safety problems associated with other. A fiberglass cable tray, also called an FRP cable tray or cable bridge in some regions, is a structural support system used to route and protect electrical and instrumentation cables.
