

# Height of the distribution box installation center

## Overview

The proper installation of a distribution box involves placing it at the right height to ensure safety and convenience. Covers wiring, placement, standards, and expert tips for a compliant setup. However, this height can be adjusted higher or lower appropriately for operational and maintenance convenience, provided design. According to the "Code for Acceptance of Construction Quality of Building Electrical Engineering" GB50303-2002, the vertical distance between the bottom surface of the fixed stainless steel enclosure ip67 and the ground should be greater than 1. The bottom surface. The IEC (International Electrotechnical Commission) and BS 7671 (British Standard for Electrical Installations) both provide essential requirements for electrical installations, including those for fuse boards like garage unit, consumer unit and distribution board.
