

High Precision Edge Data Center

Overview

Siemens Smart Infrastructure, Cadolto Datacenter GmbH (Munich, Germany), and Legrand Data Center Solutions (Baiersdorf, Germany) are jointly unveiling a next-generation modular edge data center – a turnkey solution engineered for speed, scalability, and sustainability. At EdgeConneX, we're more than a reliable and trusted partner—we are catalysts for innovation, revolutionizing how industries operate with AI-enabled, high-density data centers. The innovative system will. Edge data centers are smaller, distributed facilities positioned close to end users that process data locally instead of sending it to centralized cloud regions. This proximity reduces latency from 50-100 milliseconds down to single digits, which matters for applications where every millisecond of. The global market for edge data centers is expected to nearly triple to \$13. These facilities deliver reduced latency, enhanced performance, and bandwidth optimization—critical advantages for time-sensitive applications across.
