

How to connect two network segments to a switch

Overview

This guide explores three methods (Layer 3 devices/dual-NIC hosts/firewalls) to connect 192. 0/24 segments, with Huawei switch and Linux examples, addressing enterprise network isolation and cross-department access needs. Where two or more Cisco switches are connected to a single common switch, each has a VLAN interface configured with a different ip network and with no further configuration or a router, they are able to ping each other. Additional support information - please understand points 1 and 2 explained. We have a existing network setup where we have two D-Link switches,connected to each other. IPs are manually assigned in the range of 192. 255 0 . Network segmentB 192. You can daisy chain them, star link them, cascade them, cluster them or stack them.
