

How to mark a 24-core optical cable

Overview

For a 24-fiber cable, there are two 12-fiber groups. Within each group, fibers follow the standard 12-color sequence. For 24-fiber cables, tubes are color-coded (blue tube containing fibers 1-12, orange tube. WolonFiber's 12-Color Fiber Optic Pigtail Packs are manufactured strictly to the TIA-598-C standard with vibrant, easy-to-identify colors. Perfect for fast, error-free termination in your ODF or splice closures. Available in OS2/OM3/OM4 at factory-direct wholesale pricing. How to Identify Fibers in. The most efficient labeling system for fiber optic cables comprise these key components: The cable identifier: An alphanumeric code that differentiates this cable from other cables within your facility. With clear tables and updated details, it serves as a comprehensive reference for technicians handling modern fiber optic installations.
