

Huawei invests in optical modules

Overview

To tackle these challenges, Huawei has launched its StarryLink optical modules for data center networks, featuring three robust capabilities: spanning, stable, and secure, delivering a "3S" high-quality network experience for enterprises. This launch took place during the data center session themed "Building New Data Centers in the Intelligent. Surging AI data centre workloads and the rise of high-speed computing are reshaping how the world moves information. BARCELONA, Spain, March 3, 2026 /PRNewswire/ -- At the Mobile World Congress (MWC) 2026, held in Barcelona from March 2 to 5, Huawei showcased its latest advancements in optical technologies for enterprise customers under the theme "Optical-Intelligence Convergence, Powering AI for All Industries. The market, projected to reach \$14. 7 billion in 2025, is forecast to. In the AI era, data center network interconnection presents new challenges for optical modules, requiring significant improvements in transmission distance, O&M efficiency, and interconnection security.
