

Installation location of the small fan in the distribution box

Overview

In its standard application, the filter fan is mounted in the lower part of the cabinet, on the side wall, to introduce cooler outside air and expel the warm on from the exhaust filter positioned in the upper area. Warm reminder: Do not disassemble or modify without experience and professionals. Select location Before. Before installation, it's important to know what makes up a distribution box. The enclosure protects the electrical components from water, dust, and damage. A. Accessibility is one of the most important factors that you need to take into account when choosing the installation place. Besides, it should be easy to find and convenient to access by electricians and maintenance personnel. The Unico System can be installed in loft/roof or ceiling voids, basements/underfloor spaces, or laterally in adjoining utility areas. Unico System air handlers can be installed in vertical as well as horizontal configurations. Check the safety of the installation location Away from moisture and corrosive environment The installation location should be away from moisture sources and corrosive. The first step is to determine the ideal location for your house fan.
