

Intelligent Distribution Network Automation System IDS

Overview

The latest version of Huawei's Intelligent Distribution Solution (IDS) uses data from IoT sensing devices and AI to create an environmental sensing network, providing real-time risk alerts and transforming reactive measures into pre-emptive strategies. In recent years, global power distribution. At this year's Congrès International des Réseaux Electriques de Distribution (CIRED 2025), Huawei announced and showcased new features for its Intelligent Distribution Solution (IDS). The business also demonstrated its latest achievements in the global digital distribution field, with the aim of. The IDS Smart Distribution Network Solution represents a cutting-edge approach to modern power distribution management, combining advanced technology with intelligent automation. David Sun, the VP of Huawei and CEO of Electric Power Digitalization BU, gave a keynote speech and introduced the IDS solution. Developed in collaboration with.
