

Intelligent Reclosing Distribution Box

Overview

The Smartcloser is an automated recloser for overhead distribution networks that reduces the duration of power outages and automatically isolates faulty network sections. • Intelligent leakage reclosing can be realized according to user requirements. This intelligent device enhances network reliability by automatically performing fault isolation and reclosing. This guide covers what smart auto reclosers are, how they work, their core functions, key selection criteria, applications, and why utilities worldwide are choosing GOTO Electrical's GTAR Smart Auto Recloser solutions. Like circuit-breakers they are capable to switch normal and fault currents, and can trip and reclose up to four times. You'll find them in industrial parks and commercial centers.
