

Is the distribution box separately grounded

Overview

Each DISTRIBUTION BOX and controller must be grounded. 26 mm² (10 AWG) ground wire must be used, and in all other markets a 6 mm² must be used. Grounding of the units: Attach a ground wire from one of. NEC 250. 26 (Clearance. The installation of a ground bar in the box, separately connected to the main panel's ground bar, is the answer to the question of how to ground a subpanel, as wrong grounding endangers the inhabitants of the house. Make sure all tools are intact to prevent accidents during the grounding. What if the box is not metal, but the ground wires are bare?

Should you connect all the grounds from each panel separately and take steps to ensure they stay separate?

EG use divider?

Having power in the same box from two different panels is probably not the best idea.
