

Latest Energy Internet

Overview

Top energy news: Tech sector drives renewable power purchase agreement spike; EU proposes gas storage rule extension; and more This round-up brings you the key stories from the energy sector over recent weeks. Scientists from EUROfusion and ITER will participate on-site to gather data for future fusion reactors. The device will be evaluated in real operating conditions, with the aim of. The IEA's flagship World Energy Outlook (WEO) is the most authoritative source of global energy analysis and projections. Updated annually to reflect the latest energy data, technology and market trends, and government policies, it explores a range of possible energy futures and their implications. Global energy systems are entering a structurally new phase defined by the primacy of energy security and systemic resilience over cost optimisation. The IFuEL project is developing efficient solid-state laser technology for sustainable.
