

Libya s emergency communication tower

Overview

Long-range communication equipment is urgently required for effective rescue operations, given that most telecommunication networks are down. The ETC is currently not active in Libya but the local ICT working group can be engaged to coordinate the planning of assessment and services. The General Authority for Communications and Informatics announced yesterday the launch of what it referred to as a pioneering National Emergency Telecommunications Management Plan, which includes 34 operational measures, most notably the establishment of an Early Warning System. The Authority says. Work ends on fixing the equipment on a tower near Derna, Libya. A team from Huawei Libya headed to the scene almost immediately, and by Sept. 14, had restored 95% of coverage. Eastern Libya is grappling with an unprecedented humanitarian crisis in the wake of Storm Daniel—that made landfall on 10 September including strong winds and. The National Center for Emergency, Crisis and Disaster Management is the body responsible for coordinating and implementing policies and procedures related to emergency, crisis and disaster management in the country. 1035 of 2007 and reorganized by Cabinet Resolution No. As part of the initiative, officials unveiled the (Sa'ed) platform, a new system designed.
