

Low-voltage electrical complete equipment qualification

Overview

Low voltage certification is formal training that qualifies workers to work on electrical systems under 750 volts safely. EQF stands for European Qualification Framework. This level corresponds to a secondary education in electro-technology (MBO level 3), but you can also achieve this. This Directive covers electrical equipment designed for use within certain voltage limits which is new to the Union market when it is placed on the market; that is to say it is either new electrical equipment made by a manufacturer established in the Union or electrical equipment, whether new or. Train to be an authorised person responsible for limited switching operations on low voltage power systems with our authorised person training course. Book now by choosing your course date. uk for more information PASS Stockton. Low Voltage compliance training designed for experienced engineering staff with the responsibility for the control, operation or maintenance of installed low voltage systems. The LVD lays down 11 safety objectives that all low voltage electrical equipment must conform to.
