

Machinery used in optical cable construction

Overview

Key optical fiber manufacturing equipment includes drawing towers for creating the fiber, coloring and buffering lines for protection and identification, stranding machines (like SZ stranding lines) to assemble the cable core, and jacketing lines to apply the final. Key optical fiber manufacturing equipment includes drawing towers for creating the fiber, coloring and buffering lines for protection and identification, stranding machines (like SZ stranding lines) to assemble the cable core, and jacketing lines to apply the final. BM-Rosendahl is the global supplier of production equipment for lead-acid and lithium-ion batteries. The portfolio ranges from solutions and equipment for enveloping, sleeving, wrapping & stacking, cast-on-strap to the assembly of automotive, motorcycle, industrial, and e-mobility batteries.

Comprehensive. Tensor has been building world-class fiber optic manufacturing solutions for over 30 years. Superior bearings and frames, coupled with an innovative low-tension process, ensure no project is too difficult or too sensitive to accomplish—even those involving bend-sensitive and multimode fiber. comWhether you are looking for pay-offs and take-ups for electrical cables and optical fibers or machines for insulation and extrusion, this is the perfect place for you.
