

Miniature Fiber Optic Heat Shrink Tubing Machine

Overview

This is an automatic heat shrinkable tube heat shrinking machine, which is widely used in the wire harness processing industry. The Osprey device (Registered Design Protected) has been developed in-house using state of the art CAD 3-D modelling and flow simulation software. Osprey brings together the traditional heat gun method of. The Haloblaze range of Heat shrink tube processing machine device are designed to reduce the costs of heat shrink processing. Faster, safer and give the operator full quality control over the shrink. Our heat shrink equipment seals and protects electrical splices and provides mechanical protection for fluid management systems in harsh environments. The parameters and temperature can be adjusted to meet different technological requirements of heating tube.
