

Miniature Optical Cable Laying Device

Overview

This small, very lightweight, easy-to-use blow-in device, can lay micro and mini cables without interruption even over long distances. All components are selected and manufactured to meet the. For your cable laying projects, we can carry out a wide range of feasibility calculations in advance based on the information you provide. Even the best equipment technology needs a trained operator - we offer you individual instruction and training in your new equipment technology. For micro and mini cables Ø 1. All. Fast Internet and higher data transfers for home: Specially designed for the increasing demand for subsequent fiber optic installations in existing and occupied cabling systems, the Kati Blitz Mini makes this fiber cable laying possible. Maximum mobility is one of today's highest requirements. ransmi incl.
