

Modular Connector for Column Header Cabinet

Overview

Our Modular System is a concealed, self-tightening, and disassemblable connector designed for furniture and cabinet construction. The ability to accommodate multiple functions and connection options in a single connector is becoming increasingly important, even in harsh industrial. In this video, we walk you through the complete installation process of a GRL busbar system for a column head cabinet with circuit breakers. Today's vehicles are adding more functionality and are creating much more data. It can also be easily mounted on metal profiles and is compatible with wood, plastic, and chipboard materials from 16 mm thickness. Versatile and Easy to Process The. Save time and space with an intelligent modular connector system The Module Connect is the concept of a new type of plug-in connector for connecting electrical cables, fibre optic cables and pneumatic hoses.
