

Nabatk Fiber Optic Sensor Amplifier

Overview

High-performance digital fiber amplifier with smart tuning and power saving functions to keep the amplifier running more accurately and efficiently. Small and special sensor heads, optimal for limited & difficult environments. Three times higher emission power and 1.6 times. Fiber optic sensors are small enough to fit in confined areas and can be positioned precisely where needed with flexible fibers. Plastic or Glass Fiber Optics?

How to Choose The Sensor Selection Guide briefly explains Banner's array of sensing technologies, and helpful flowcharts make it easy to. Omron's high-performance fiber optic sensors and amplifiers come in a wide variety of configurations to meet your specialized requirements. In addition to the basic requirements with 20-turn potentiometer for sensitivity adjustment with high resolution, also available are 2 switches for light/dark. Fiber optic sensor features NPN/PNP, NO/NC output modes for selection.
