# New Installation Solution for Cuban Optical Cable Laying

## Overview

The ARIMAO submarine fiber optic cable is designed and deployed to improve internet connectivity between the islands of Cuba and Martinique. The cable's deployment began on December 8, 2022, from the tricontinental port in Cienfuegos, Cuba. Cuba speeds up connection process for international fiber optic cable The Ministry of Communications has announced that construction has begun on a new international fiber optic cable called Arimao, which will increase and diversify the island's international connectivity. According to the Ministry, the linking process and future tests are currently underway after. Our hybrid power system combines efficient gensets and battery packs for stable DP operations, reduced fuel consumption, and lower emissions. The cable that we use stands synonymous with fineness. Experts at Pace Digitek focus on the meticulous preparation of cables.
