

New MTP Connector

Overview

MTP® Elite connectors are a new type of MTP® connector that is more advanced and can work better in difficult network environments. They have an ultra-low insertion loss around 0.10 dB and this sets the standard for signal integrity. * With no special skills or training required, you can easily perform polarity and pin reconfiguration in the field without removing the. US Conec offers a full suite of MTP® brand MPO connectors and solutions for a variety of applications and operating environments. The MTP® connector design offers novel patented features, enhanced precision, proven reliability, and significant performance improvements compared to the standard MPO. MTP® is the acronym for Multi-fiber Termination Push-on, which is a registered trademark of US Conec. This article will help you understand the differences between MPO vs MTP fiber.
