

Nr802 Microcomputer Relay Protection Tester

Overview

NR802 Three-phase protection Relay Tester by Nanruo offers precise voltage and current output, ideal for auto testing. Enjoy 1-year warranty and customized support. Meet all test requirements on site. It can test not only various traditional relays and protection devices, but also various modern microcomputer protections, especially for transformer differential protection and. NR802 microprocessor-based protection relay test set is adopted advanced structure, which can run independently on the machine or connected with a laptop or computer to operate. The host computer is equipped with a new generation of high-speed digital signal processor, a true 16-bit DAC module, a. Protection relay tester which offers all the characteristics and functions needed for protective relay testing, in a manual or automatic mode, designed for maximum efficiency, flexibility and simplicity, with the required accuracy and performance to test any kind and type of relays in all. The market for LND 802 microcomputer relay protection testers is dynamic and competitive. Understanding the key trends shaping this segment is crucial for making informed procurement decisions. comGood received in good condition. Second purchase, value of money.
