

# OPGW Optical Cable Communication Project

## Overview

QZ Cable's Optical Fiber Composite Ground Wire (OPGW) has played a transformative role in several projects across Africa, combining power transmission and high-speed communication in one solution. Such cable combines the functions of grounding and telecommunications. Prysmian has a built-in multi-step quality assurance programme, which covers the entire production process from cable design and raw materials purchasing, to final inspection for any single project. Prysmian never has a pre-determined answer to a challenge – instead, Recommendation ITU-T L. An OPGW cable contains a tubular structure with one or more optical. The most important types of these cables are OPGW (Optical Power Ground Wire), OPCC (Optical Phase Conductor), ADSS (All-Dielectric Self-Supporting) and SkyWrap.
