

Optical Modules in Q1

Overview

Driven by global AI data center demand, Chinese exports of 1.6T optical modules and fiber optics surged in Q1, with factory orders booked through 2028. Chinese exports of fiber optic cables and optical modules saw double-digit growth in the first quarter, driven by massive global investments in. Chinese exports of optical fibre and transceiver modules posted double-digit growth in Q1 2026. 735 billion yuan, surpassing its full-year 2024 profit. Management confirms capacity is being expanded. Overview: The Iran-US-Israel war that escalated in Q1 2026 left a clear mark on the optical transceiver modules sector. Optical transceiver modules, converting electrical signals to optical for high-speed fiber optic data transmission in data centers, telecommunications networks, and defense. Optical module demand is being pulled in two directions at once, faster bandwidth for dense networks and tighter constraints on power, security, and lead times. As hyperscalers ramp up build outs, the appetite for bandwidth continues to rise.
