

Outdoor cabinet installation height

Overview

Mark a level line from the center of the wall at 34-3/4" high. Most outside areas are sloped for drainage, so start with the cabinet at the highest point of the slope. We recommend that you take all doors off and remove all drawers. Below is a detailed guide for the installation and use of outdoor cabinets:

- **Site Selection and Planning**
- **Geographical Location:** Choose a location with elevated terrain and good drainage to avoid water accumulation in low-lying areas.
- **Environmental Assessment:** Evaluate on-site conditions. A height of 60–70 inches ensures the cabinet is tall enough to store long tools or larger items. Plumb the cabinets vertically using a level. Level the cabinets. Consider the overall dimensions of the cabinet, including the height, width, and depth, to ensure it complements the surrounding environment and meets your functional requirements.
